The login password can be changed any time.

It is advisable to change your login password periodically for your safety.

### **10. How many passwords do I have for Internet banking?**

There are only two password precisely Login Password & OTP (One Time Password), and No transaction password.

### **11. What is the policy on creating passwords?**

Login password credentials should be in the form of minimum 6 alphanumeric characters and a special character.

Your new password cannot be the same as your last one login password.

### **12. What is an OTP?**

OTP is the One Time Password which is sent to your registered mobile number while performing any transaction or adding payee.

The transaction will not be complete unless you enter the OTP in the valid option.

### **13. I am not receiving OTP on my mobile?**

If you are unable to receive the OTP on your registered mobile number, check whether your mobile handset is within the network area. If you still encounter the problem, contact your Mobile service operator or your nearest branch or enquire on Help Line.

### **14. What are the general precautions to be taken to protect my account on the internet?**

To protect your account from any fraud please take care of the following points:

1. Do not disclose your passwords to anyone.  
Do not write it down. Avoid using the same passwords for all your online transactions.
2. Change your password quite often to protect your account.
3. Avoid opening or replying to spam emails, as this will give the sender a confirmation that they have reached a live address.
4. Never respond to emails that request personal information.

5. Create a complex password which will be difficult to crack.
6. Avoid using cyber cafes to access your internet banking accounts
7. Cyber cafes PCs may be infected with viruses that can capture and transmit your personal data to fraudsters.
8. Beware of typing passwords on unknown PCs.
9. Installing antivirus software and keeping it up to date will help detect and disable malicious attacks.
10. Before submitting your bank details or other sensitive information there are a couple of checks you can do to help ensure the site uses encryption to protect your personal data:
11. If the address bar is visible, the URL should start with 'https: //' ( 's' for secured) rather than the usual 'http: //'.  
**12. Thane Bharat Sahakari Bank we would never ask for your personal details through an email or through phone, fax or in person.  
If any of our bank personnel asks you for your password, do not disclose.**

**15. What is Registered Mobile number?**
